

ORGANIC / SOFT CHEMICAL TREATMENTS

DOSAGE

- 3 tablets (1.5 bags) to ensure a full treatment.

PROPER PLACEMENT OF MEDICATION

- Take one of the 2 tablets and break it into 4 pieces.
- Open the beehive and set the single pieces of the tablet around the edge of the brood nest on top of the top bars (in the corners of the beehive).
- Don't place the product in the center of the beehive or near the brood.

TREATMENT DURATION

- 1st application: leave 7 to 10 days
- 2nd application: leave 7 to 10 days
- 3rd application: leave 12 days

HOW IT KILLS MITES

- Manufacturer's reported efficacy rate: 94%
- Evaporation - kills phoretic mites

RECOMMENDED APPLICATION TIME

- Effective between 64 and 95 degrees (°F)
- For best results treat colonies in the late afternoon or evening when the temperature is lower and the bees are in, or returning to the hive.

USAGE WITH HONEY SUPERS

- Not recommended. Remove honey supers before application.

PROS

- Can be effective against tracheal mites

CONS

- Temperature dependent
- Used at temperatures over 95° F may increase agitation, stress of bees and increase bees and bee brood mortality.
- Can be a skin irritant; wear protective clothing

ApiLifeVar™

Active Ingredient:

Thymol (74.09%),
Oil of eucalyptus (16%),
Menthol (3.73%)
