Dihydrate**

- Please research each medication thoroughly before using. Selection & use of medication will depend upon your region, your colony strength & health, your IPM strategy, and your weather.
- These are treatments registered on a federal level. For more info visit:
<https://www.epa.gov/pollinator-protection/epa-registered-pesticide-products-approved-use-against-varroa-mites-bee-hives>
- Beekeepers should check with their state pesticide regulatory agencies to determine the regulatory status of the products in their individual states. Only use treatments approved by federal and state agencies.
- Please refer to manufactures' website, guidelines, and instructions for up-to-date information and before applying treatments.
- It is recommended to rotate medications to prevent mite resistance & to follow a 2-3 year comb replacement schedule to prevent medication build-up in comb.
- Off label or off brand use of medications and active ingredients can lead to mite resistance; harm to your bees, honey and wax; environment; or personal injury.
